DESCRIPTION OF THE UNIVERSITY

South Florida, with an estimated population of over four million people in Miami-Dade, Broward, and Monroe Counties in 2010, is one of the most artistically expressive, ethnically diverse, and cosmopolitan regions in the United States. As the gateway to Latin America and the Caribbean, it is a global center for trade, finance, manufacturing, tourism, and health care.

In this milieu, Florida International University (FIU) was chartered by the Florida Legislature in 1965 to offer upper division and graduate programs. FIU opened its doors in 1972 to the largest opening-day enrollment in the history of American higher education. Initially a two-year upper-division school with limited graduate programs, FIU added lower-division classes in 1981 and received authority to begin offering degree programs at the doctoral level in 1984. The University has two main campuses, the 344-acre Modesto A. Maidique (MMC) campus in western Miami-Dade County, and the 200-acre Biscayne Bay Campus (BBC) in northeast Miami-Dade County.

Committed to both high quality and access, FIU meets the educational needs of full-time and part-time undergraduate and graduate students, and lifelong learners. Reflecting the vibrant ethnic diversity of South Florida, FIU students are 61% Hispanic, 15% White, 13% Black, 4% Asian/Pacific Islander, and 7% other minorities.

FIU is a public research university offering a broad array of undergraduate, graduate, and professional programs in carrying out the University’s mission of “high-quality teaching, state-of-the-art research and creative activity, and collaborative engagement with our local and global communities” in eleven colleges and schools: College of Architecture and the Arts, College of Arts and Sciences, College of Business Administration, College of Education, College of Engineering and Computing, College of Law, Herbert Wertheim College of Medicine, College of Nursing and Health Sciences, Chaplin School of Hospitality and Tourism Management, School of Journalism and Mass Communication, and the Robert Stempel School of Public Health and Social Work.

Through these colleges and schools, FIU offers more than 175 bachelor, masters, and doctoral degree programs and conducts basic and applied research. Interdisciplinary centers and institutes conduct collaborative research to seek innovative solutions to economic, technological, and social problems. Numerous programs are also offered at off-campus locations and online. With a student body of over 46,000, more than 800 full-time instructional faculty, and over 8,000 degrees awarded annually, FIU is the largest university in South Florida and one of the 25 largest public universities in the nation. More than 110,000 FIU alumni live and work in South Florida.

Ninety-seven percent of FIU full-time tenured or tenure-track instructional faculty members hold doctorates or the highest degree attainable in their fields. FIU is the only urban public university in the state to be a member of Phi Beta Kappa, the nation’s oldest scholarly honorary society. The Carnegie Foundation for the Advancement of Teaching classifies FIU as a Research University/High Research Activity. The University’s annual research expenditures exceed $100 million.
All academic programs of the University are approved by the Florida Board of Governors and the FIU Board of Trustees. The University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (SACS) to award bachelor, masters, and doctoral degrees. SACS reaffirmed FIU’s accreditation in December, 2010. Degree programs at FIU are accredited or approved by the appropriate specialized accreditation agency.

On August 28, 2009, Florida International University’s fifth president, Mark B. Rosenberg, took the oath of office. Rosenberg is former chancellor of the State University System of Florida and the first FIU faculty member to ascend to the presidency of the University.

**DESCRIPTION OF THE COLLEGE OF NURSING AND HEALTH SCIENCES**

Nursing was present on the FIU campus from 1972 to 1978 when a RN-BSN degree was offered through the School of Public Affairs and Services. In 1982 the School of Nursing was established on Biscayne Bay Campus (BBC) as an upper division unit through start-up funds provided by nine Miami hospitals. These institutions were concerned about the acute nursing shortage and were interested in providing baccalaureate education for qualified men and women who could assume beginning leadership positions in health care in the rapidly growing southeast Florida area.

During 1997, the School merged with the College of Health to create a new academic unit, the College of Health Sciences. The College of Health Sciences included the School of Nursing and the Departments of Physical Therapy, Occupational Therapy, Dietetics and Nutrition, Medical Laboratory Sciences, Public Health, Health Information Management, and Speech-Language Pathology. The rationale for the merger was to enhance one of the University’s strategic themes, *Health*, through the consolidation of the health professions programs and development of interdisciplinary education and research.

During 1999, the merger of the College of Health Sciences with another academic unit, the College of Urban and Public Affairs, gave rise to a new college, the College of Health and Urban Affairs (CHUA). CHUA included four schools: School of Nursing; School of Health Sciences; School of Social Work, Policy and Management; and Stempel School of Public Health. The purpose of the restructuring was to consolidate the health related fields in one college and to enhance interdisciplinary education and research in these areas. Dr. Ronald Berkman was appointed Executive Dean of the College and Dr. Divina Grossman was appointed Dean of the School of Nursing.

In December 2004, the School of Nursing joined its sister schools in CHUA by relocating from the BBC to a newly constructed Health and Life Sciences II building at the Modesto A. Maidique Campus (MMC), a distance of approximately 20 miles. The move to the MMC was part of an overall strategy to locate nursing with other health related units in the context of the proposed medical school and the development of the academic health sciences complex. The new building provided nursing classrooms, teaching laboratories, offices, and research space. To provide for expansion, the School retained offices, classrooms and laboratories at the BBC.

On October 1, 2006 the School of Nursing was transformed to the College of Nursing and Health Sciences (CNHS) when CHUA was disaggregated into three (3) autonomous units: the CNHS, the College of Social Work, Justice, and Public Affairs,
and the Stempel School of Public Health (SSPH). The CNHS included Nursing and the Departments of Physical Therapy, Occupational Therapy, Health Information Management, Health Sciences, Communication Sciences and Disorders, and Athletic Training. The disaggregation provided autonomy for the educational units as they sought accreditation or re-accreditation from their professional agencies and laid the foundation for the future health sciences complex. Dr. Divina Grossman was appointed Dean of the CNHS and reported to the Provost.

In August 2006, as part of FIU’s Strategic Initiatives, a nursing program was re-established at the BBC. In December 2006, University administrators announced that a new CNHS building would be erected on the MMC. The $34 million 113,000 sq. ft. building would house the College’s combined disciplines that were scattered throughout two buildings and rapidly outgrowing them. The CNHS building (AHC 3), completed in December 2009, became part of the academic health sciences complex envisioned at the MMC.

In 2009, the University-wide budget cutting process required a feasibility review of all CNHS programs and tracks. Two College departments (Health Information Management and Health Sciences) were phased out as a result of the review. CNHS expansion re-occurred in 2011 with the assimilation of Health Services Administration, a baccalaureate level program previously housed in the Stempel College of Public Health. In February 2010, CNHS Dean Divina Grossman resigned; Dr. Sharon Pontious was appointed Interim Dean until July 1, 2011 when Dr. Ora Strickland was appointed CNHS Dean.

The College’s undergraduate and graduate nursing programs are fully accredited by the Commission on Collegiate Nursing Education (initial accreditation occurred in 2008), the Council on Accreditation (COA) of Nurse Anesthesia Educational Programs (re-accreditation occurred in 2010), and are approved by the Florida Board of Nursing (re-approval occurred in 2011). The nursing unit holds institutional memberships in the American Association of Colleges of Nursing (AACN), the National League for Nursing (NLN), the Florida Nurses Association (FNA), the Nursing Shortage Consortium of South Florida, and the South Florida Hospital and Health Care Association. Nursing degree programs currently offered by the College are a bachelor’s degree in nursing, a master’s degree in nursing, and a doctoral degree in nursing. A post-master’s degree, the Doctor of Nursing Practice, was implemented in January, 2012.

**Bachelor of Science in Nursing (BSN)**

The Bachelor of Science in Nursing (BSN) program was approved in 1982 by the Board of Regents of the State University System. Upon completion of the BSN program, the basic (generic) student graduate is eligible to become licensed as a registered nurse. The nursing unit also offers a RN-BSN completion track. Graduates of the BSN program are eligible for master’s level studies. In addition to the generic BSN program, the nursing unit offers a track for foreign-educated physicians (FEPs) to complete the BSN. The FEP-BSN track, the first of its kind in the nation, enables foreign-educated physicians who are unemployed or underemployed, to complete a BSN. In 2010 the FEP-BSN track was transformed to an accelerated combined BSN/MSN track; FEP students who qualify for admission to the MSN program continue into the nurse practitioner specialty tracks; students not admitted to the MSN program complete the BSN degree.
Master of Science in Nursing (MSN)

The Master of Science in Nursing (MSN) program was approved by the Board of Regents in 1992. The MSN program offers nurse practitioner specialty tracks in Advanced Adult Health Nursing, Advanced Child Health Nursing, Advanced Family Health Nursing, and Anesthesiology Nursing. Two specialty tracks (Advanced Psychiatric-Mental Health Nursing and Nursing Administration) are under moratorium for admissions because of low enrollments. Graduates of the program are qualified to apply for certification examinations in their specialty areas. Nurse practitioner graduates who are nationally certified can obtain advanced registered nurse practitioner (ARNP) certification through the Florida Board of Nursing. Graduates of the MSN program are eligible for doctoral level studies.

Doctor of Nursing Practice (DNP)

The Doctor of Nursing Practice (DNP) program was approved for implementation by the FIU Board of Trustees and Florida Board of Governors in 2010. The DNP program is a post-masters plan of study for the registered nurse with specialty preparation in advanced clinical nursing practice (nurse practitioners, nurse anesthetists, nurse midwives). DNP graduates exit the program with advanced skills and competency in 1) analyzing, designing, implementing, managing, and evaluating health care practice, policy, and delivery systems; 2) facilitating the application and integration of research into clinical practice using innovative approaches across multiple settings to improve health care, patient outcomes, and health care systems; and 3) preparing to assume leadership roles in practice, education, and management.

Doctor of Philosophy in Nursing (PhD)

The Doctor of Philosophy in Nursing (PhD) program was approved by the Florida Board of Governors in 2003. The program’s purpose is to develop individuals who will be leaders and educators in generating and applying the science needed to guide nursing practice. Graduates have the knowledge and skills to conduct research in the health care field, and direct and guide application of other evidence-based health care findings to improve the health of people from diverse cultures and underserved populations. In 2009 a BSN-PhD track was added for students who demonstrate outstanding academic accomplishment in their undergraduate courses. The BSN-PhD track builds on student’s nursing knowledge and skills at the baccalaureate level, includes master’s level courses to prepare students for advanced practice roles, and provides the foundation for students to engage in a program of intellectual inquiry at the doctoral level.
THE 1999 FACULTY SENATE BILL OF COLLECTIVE RIGHTS AND PRINCIPLES OF GOVERNANCE

Every unit in the University shall guarantee explicitly these rights in their governance documents and observe these rights in the future:

- **Academic freedom** refers to the freedom and responsibility of faculty in their role as teachers, researchers, citizens in the academic community, and participants in the collegial governance systems and processes. They are entitled to pursue a course of study, carry out research, publish findings, teach, artistically create, and speak out in matters of controversy without fear of reprisal or censorship, and unhindered by pressures from internal or external groups.

- Through collegial governance, University faculty members decide and develop the curriculum which will be offered to students within the limits established by state rules and regulations. Faculty members are the academic authorities of the University.

- Each freestanding school or college must have a democratically established collegial governance system. These governance systems and their governing documents may only be revised by democratic vote of the college or school faculty.

- The faculty of each unit have the right to participate in the selection and appointment of their administrators. In particular, department chairperson and school directors may only be appointed following a free and fair election.

- The faculty of each unit of the University have the right to participate in the evaluation of their administrators. This right includes participation in the creation of evaluative criteria. Evaluations shall be conducted annually in a process which protects the anonymity of the evaluators. Those to be evaluated include department chairs and school directors, deans, the Provost and the President. Faculty have the right to see the results.

- The faculty of each academic unit, including departments, schools or colleges and the University as a whole, have the right and responsibility to conduct a vote of confidence in their leadership at any time they see fit.

- The Faculty Senate may censure individuals and any formal, organized units when it determines they have violated these rights and principles.

Faculty Senate, 1999
NURSING FACULTY EMPLOYMENT INFORMATION

Sign-on Procedures
The CNHS Office of Administrative Affairs provides specific instructions and information about signing-on with the University. New FIU employees must attend an orientation to obtain information about policies/procedures, benefits, wages, and accessing University programs and software. Paychecks are direct deposited and there may be a 4-6 week delay for the first check. Sign-on procedures are posted on the FIU Human Resources website.

Panthercard ID and Email Account
All faculty (fulltime and adjunct) members must obtain a picture identification card (Panthercard) that is valid for the term of employment. The process for obtaining an identification card will be explained during the sign-on procedure. In the clinical area, nursing faculty must wear an ID that identifies her/him as a faculty member with the nursing unit. The FIU picture ID can be slipped into a plastic sleeve and pinned to clothes where it is easily seen. The Panthercard also serves as a library card. All faculty members have library privileges during the term(s) they are on contract.

A University e-mail account is activated for the every faculty member. E-mail accounts provide an additional mechanism for communicating with students, faculty, and University staff. Instructions for obtaining an email account are provided in orientation.

Personnel Folders
The CNHS Office of Administrative Affairs maintains personnel folders for both fulltime and adjunct faculty. Faculty and faculty administrators may add to and update the file as the occasion arises, such as the annual evaluation. Faculty members have the right to review their personnel file at any time. See the BOT-UFF Collective Bargaining Agreement for additional information.

Report of Outside Activity
Fulltime nursing faculty members often are employed or practice outside the University to maintain their clinical skills. The University requires a report from all employees who engage in outside activities. These activities include any private practice, private consulting, additional teaching and research, or any other activity (compensated or uncompensated) which is not part of the employee’s assigned duties and for which the University receives no compensation. Conflicts of interest, including those arising from University or outside activities, are prohibited. It is the responsibility of the employee to submit an online Faculty Outside Activities and Conflict of Interest Report. See the policy the additional information.

FIU Employee Tuition Fee Waivers
Fulltime faculty members who have been continuously employed for at least six months by the University and who meet academic requirements can enroll for up to six credit hours of on-campus instruction per term without payment of the registration fee. This benefit is granted on a space-available basis and cannot be used for thesis, dissertation, independent study, and practicum. The FIU Employee Fee Waiver form is available on the FIU Human Resources website. The form must be completed by the employee and the approved supervisor(s) prior to being presented to the Cashier's office. Allow sufficient time (at least three weeks) for approvals to be completed by all parties.
**Termination of Employment**

When a faculty member terminates employment with the CNHS, the letter of resignation to the Dean should include the date of the last working day and a brief statement of the reason for resignation. The Dean will schedule an “exit” interview as required by the University. On the last working day, the employee shall return all office, desk, and file keys to the CNHS Office of Administrative Affairs. The employee should also provide the Dean’s Office with a forwarding address and his/her grade book.

**NURSING FACULTY TEACHING/ADVISEMENT INFORMATION**

**Before the Semester Begins**

**Policies/Procedures Related to Teaching**

FIU policies/procedures that are of special interest to faculty members are related to student conduct and academic misconduct. These policies and others (e.g., disabled student, sexual harassment, etc) are described more fully in the *FIU Student Handbook* and the nursing student policies/procedures manuals. Instances of academic dishonesty occur, and faculty members must follow the procedures correctly. Discuss any possible student violations of policies with the Program Director immediately.

Students have the right to file a grievance related to academic decisions and issues, such as grades, course requirements, and program progression. The CNHS has posted the academic grievance policy/procedures on the website to assist students, faculty members and administrators with the process.

**Faculty Office Schedule**

Each semester, nursing faculty members must complete a weekly schedule card and post it outside their office door. Office hours are to be posted with a minimum of six (6) hours per week during usual student class days. Secretaries may schedule appointments with faculty during their scheduled office hours. A copy of the schedule should also to be filed with the Program secretary.

**Course Syllabus**

Faculty members are required to provide students with a detailed syllabus at the first class meeting. For faculty members who have not taught the course previously, the Course Coordinator/Track Leader or the Program Director can provide a recent syllabus. If revising the syllabus, please discuss the revisions with the Course Coordinator/Track Leader before distributing it to the students. Course syllabi must follow a standard template and include specific information. The course objectives cannot be changed.

**Textbook Orders**

Selecting and ordering textbooks, including adjunct faculty textbooks, are the responsibility of fulltime faculty members in consultation with the Program Director. Book orders can be ordered online through the *FIU Bookstore*. The faculty member must complete the request at least 45 days before the start of the term or the announced deadline. If a faculty member is asked to teach a course shortly before the semester begins, he/she can ask the bookstore to place a “rush” order on
the selected textbook. However, the textbook order usually takes 3-4 weeks to arrive, so the faculty member should plan accordingly.

**Copying/Typing**
A Work Request form for copies must be processed by the Program secretary who has been assigned to the faculty member. Copy requests should be made at least one week in advance (the more lead time, the better) and typing requests at least two weeks in advance.

If a faculty member needs a small number of copies (less than 10), a copy machine is available in the nursing office suite. A copy key keeps track of the number of copies (Copies made on this machine are expensive!). Students are not allowed to use the office copy machine.

**Reserving Materials in Library**
Faculty desiring to place books or other materials on reserve may do so by taking them to the library or having the librarian place them on reserve from the stacks. Books on reserve must be renewed each semester. The librarian should be consulted about specific policies and procedures related to placing copyrighted materials (such as copies of journal articles) on reserve.

**Student Advisees**
Each faculty member is assigned current student advisees. Faculty are encouraged to contact their advisees for course registration, update the student’s academic progression form, and assist the student in resolving admission and progression problems. The advisor should also provide support and referrals for students having academic or personal difficulties.

**During the Semester**

**Course Enrollment Lists**
The University's software provides faculty with "real time" course enrollment numbers and enrolled student name lists. Faculty should consult with the Program Director about obtaining current student enrollment information from the University web site. New faculty will need a Panthersoft ID to access the site. Students who do not show up on the course registration list or show a "drop" and continue to attend class should be informed about the discrepancy. It is the student's responsibility to resolve the problem.

**Students with Disabilities**
In congruence with the American Disabilities Act (ADA), faculty members (using the syllabus) must inform students with disabilities who may need special accommodations to register with the Office of Disability Services. Current documentation of disability is required to receive services. Students should be encouraged to contact each instructor so that arrangements can be made to accommodate their needs. Personnel in the **Office of Disability Services** will provide a written statement regarding any necessary accommodations.

**Classroom Environment and Equipment**
Small classroom supplies (such as chalk and markers) are kept in the office supply
cabinet/closet. If a classroom needs cleaning, the Program secretary should be notified. Absolutely no food or drink is permitted in the classrooms or laboratories. This is a University policy. If special equipment is needed for the classroom, the faculty member should contact the Coordinator of the STAR Center (clinical-related requests) or the Program secretary (other requests). Broken equipment should be reported to the STAR Center Coordinator or Program secretary.

**Illnesses/Emergencies**

**Faculty.** In the event of illness or other emergency during a scheduled class time, faculty members shall call their immediate supervisor (usually the Program Director) and the Program secretary immediately so alternative arrangements can be made. If a Director becomes ill or has an emergency, he/she shall contact the CNHS Associate Dean of Academic Affairs.

If clinical or classroom activities must be cancelled, the faculty member, Program secretary and/or the Program Director should decide how the students will be notified (such as placing a notice on the wall by the classroom door and answering student inquiries). Faculty who must cancel a class at a clinical site should notify a supervisor located at the site who can inform the arriving students.

The faculty member and the Program Director will evaluate the effect on the students' total learning. A decision will then be made regarding make-up time for students. Any make-up times need to be arranged at the convenience of the students.

**Students.** Students may become ill or experience an incident in the clinical site, laboratory, or the classroom. First, take care of the student. If the illness is minor, a faculty member can send the student home with instructions to see his/her private health care provider or go to the campus clinic. If the student experiences a health emergency, the student may have to be seen in the emergency room. Since students are required to carry health insurance, the CNHS has no financial obligation to the health care facility or the student.

Second, notify the CNHS. If the illness is minor, contact the Course Coordinator or Track Leader within 48 hours of the clinical experience. If a student experiences a health emergency or incident (needlestick, fall, etc.), the Course Coordinator or Track Leader must be notified immediately. If unable to reach the Course Coordinator or Track Leader, contact the Program Director.

**Grade Posting**
Grades cannot be posted in public halls or doors and cannot be posted by social security number, Panther ID number, or any portion thereof. Faculty should consult the Program Director on suggested methods for communicating grades (secretaries cannot report grades to students). Once submitted and posted at the end of the semester, final grades can be accessed by students (with their PIN and identification #) on the University's web site.

**Examinations**
The exam schedule and percentage toward grade must be included in the syllabus. Exams must be taken on the scheduled day. If the student is unable to take the exam because of an emergency/illness, the policies/procedures in the student
policies/procedures manual and/or syllabus must be followed. If the classroom size compromises test security, consult with the Program Director or Program secretary about moving the class to a larger room for the exam or obtaining an additional proctor. Failed exams cannot be retaken. Final examinations must be given during the scheduled final examination week (not earlier) and may be at a different time, day, or room to accommodate all students. The final exam schedule is published in the semester **FIU Class Schedule**.

If computerized answer sheets are used, contact the Program secretary for the procedure on completing the score analysis.

**Security on Examinations**
Faculty may want to remind students at the beginning of the semester and in the syllabus that students caught cheating can be charged with academic misconduct and may be dismissed from the University. To practice extra security with examinations, include the following:

- Number all exams and handouts, including paper for calculations, and insure that they are all collected at the end of the exam.

- Change exam questions routinely. It may not be necessary to change the entire question, but rather to refocus the question so that a different answer is correct. If it is a drug question, change the drug or the dose.

- Create multiple formats of the same exam so that “wandering eyes” are not enabled by looking at another student’s answer sheet or computer screen.

- Implement planned seating which changes with each exam so that friends don’t sit near friends and students don’t know where they will be sitting.

- Do not allow students to leave the exam once they have started. Remind students prior to the beginning of the exam in case they need a quick bathroom break. Once the exam has started, if the student leaves, they have finished the exam.

- Do not allow multiple students to crowd you when they are turning in their exams. Students can add or change answers while standing in line waiting to turn in their exam.

- Online exams are a special problem. Students may do online exams together by signing in first on one student’s name, completing that exam, and then going on to the next. Consult with FIU Online for strategies that prevent cheating.

- Be vigilant during exams. If you see wandering eyes, move the student during the exam to a more isolated area of the room.

- Require students to cover their answer sheets. If after being reminded once to cover answer sheets and student does not do so, enforce a penalty.
Clinical and Practicum Supervision of Nursing Students

Clinical faculty members are essential for the success of nursing students. It is impossible to learn nursing without effective clinical and practicum experiences provided in an environment that provides support and respect for students while they learn the art and science of basic or advanced nursing.

Clinical Faculty Dress
Clinical faculty should follow the general guidelines for dress established for students in street clothes, i.e., lab coats, appropriate shoes. If scrubs are worn, please wear an ID that identifies you as a faculty member with the nursing unit. You can slip your FIU picture ID into a plastic sleeve and pin it to your scrubs.

Purpose of Clinical Experiences
Clinical and practicum environments are educational environments for nursing students. While students are expected to apply the knowledge, practice the skills, and demonstrate professional attitudes consistent with professional nursing practice, the clinical or practicum experience is a learning or “practice” experience for students not a “performance” experience. Clinical and practicum experiences provide the opportunity for students to:

- Apply the theoretical concepts learned in the classroom.
- Practice skills learned in the nursing laboratory in a variety of clinical or practicum situations
- Demonstrate skills that cannot be fully experienced in the nursing laboratory.
- Practice communication skills with clients, their families, colleagues, and other health professionals.
- Increase problem-solving and clinical decision-making skills.
- Practice clinical organization and time management skills, including determining clinical priorities for individual and multiple clients.
- Socialize professionally to the nursing environments of acute care facilities and community practice settings.
- Socialize to the profession during observational and professional activities.

Alternative Clinical or Practicum Experiences
In many courses, alternative clinical and practicum experiences may be assigned to enhance student learning. Alternative learning experiences should not simply be a way to decrease the number of students on the nursing unit or a way to “reward” good students, but rather planned activities with specific objectives and available to all students. Alternative experiences may include observational activities in various health-related settings; interaction activities with patients, clients, or other health professionals; attendance and/or participation at professional conferences or meetings; or other instructional activities.

Alternative learning experiences should be cleared with the Course Coordinator or Track Leader so that all students have consistent learning activities. When alternative learning activities are assigned, there should be clearly written learning objectives for the activity and a method of evaluating the student’s learning from the activity.

Learning Objectives
For clinical and practicum experiences to be effective:
• **Learning objectives must be clear and concise.** Learning objectives must be written in a manner that is clearly understood by all students. The Course Coordinator or Track Leader for the course should review clinical or practicum learning objectives with students and clinical faculty so that all members of the instructional team understand student requirements.

• **Learning objectives must be consistent for all students in a given course regardless of clinical/practicum setting and faculty member.** The Course Coordinator or Track Leader for the course should review clinical or practicum learning objectives with students and faculty members so that all members of the instructional team are consistent in their requirements. Students in a given course talk to each other and can be confused if different faculty members have different course requirements for student success.

**Respect for Students as Persons**
For many students, clinical and practicum experiences are frightening because of the interaction with real patients with real health problems. Students should never be reprimanded in front of patients other students, or staff members. Students should be counseled in private when their performance is unacceptable. If the faculty member feels that a witness is necessary when counseling a student with deficiencies, the Course Coordinator, Track Leader, or the Director are preferred witnesses rather than agency staff.

The FIU nursing unit is proud of the diversity of its students, staff, and faculty. Such diversity can result in misunderstanding between students and faculty in regard to student expectations. Different cultural understandings of male/female roles, teacher/student roles, and nurse/patient roles may result in behavior that is interpreted as disrespectful. All faculty members are expected to be role models of cultural competence during their interactions with students, patients, and agency staff.

**Written Evaluation of Student Progress**
Students should receive written evaluation of their progress at mid-semester and at the completion of the semester. Students who are deficient at mid-semester must be informed in writing of the specific deficiencies (e.g., inadequate preparation, lack of knowledge about their patient needs, absenteeism or lateness, unprofessional behavior, etc.). Failure to provide written mid-semester evaluation for students with significant deficiencies may require that the student receive a passing grade for the clinical or practicum course.

**Continuous Remediation and Reward**
Students require continuous feedback regarding their performance. For students who are not meeting clinical or practicum objectives/standards, clinical faculty should counsel students promptly with a plan for remediation. For students who are meeting or exceeding clinical or practicum objectives/standards, praise for their work should also and be given opportunities for greater learning challenges discussed. Faculty should guide and nurture students to the highest ability.

**Opportunities for Remediation**
Students who demonstrate deficient or unsafe practice must be provided with opportunities during the clinical or practicum experience for remediation and
demonstration for improvement. Students may be referred to the nursing laboratory, the STAR Center, the Course Coordinator, Track Leader, or the Program Director for remediation or guidance for improvement. When making such referrals, there must be verbal or written communication between the faculty member and the person for whom the student is referred.

Components of BSN Clinical Experiences

Student assignments. Student assignments may be made the evening before clinical or two hours before the starting time of clinical depending upon the agency and nursing unit. Faculty may make assignments the evening before for nursing units where client turnover is not frequent, such as long term care facilities, or general nursing units. For student experiences on nursing units with rapid turnover, such as intensive care units, assignments may be made two hours prior to the start time of the clinical activity. Assignments must be made allowing sufficient time for student preparation prior to the beginning of the clinical time.

Client/patient assignments may be made by the clinical instructor, by the students, or by the instructor and students together. Assignments should be made based on student learning needs; thus clinical instructors must know what prior experiences students had and what experiences they need. Having the theory class schedule assists the instructor in assigning appropriate clients/patients to enhance learning. For example, if students are studying the respiratory system in Pathophysiology, respiratory drugs in Pharmacology, and nursing care of clients with respiratory problems in Adult Nursing, then the clinical assignment should include clients with respiratory problems. If a student has not had an opportunity to perform a specific nursing procedure on a “live” client, the instructor might assign a client who requires that procedure.

The number of clients assigned may vary with the type of clients and the ability of the student. First semester nursing students may be assigned one client at the beginning of clinical experiences and assigned two or more clients as they become more confident and skilled. In some environments such as an intensive care unit, the student may be assigned one client. It is also effective to assign two students to provide care to one or more clients together. This can reinforce the concept of collaboration in client care.

Pre-conference. During pre-conference, planning of client care continues. This is an opportunity for students to ask questions about their assigned clients and for the instructor to assess students’ preparation. It also provides students with an opportunity to organize their day and establish priorities of care. If student are expected to participate in change of shift report, pre-conference should finish so that students are on time for the report.

Clinical practice. After pre-conference and report, students may start assessing their clients and providing care in collaboration with the registered nurse responsible for the client. While the instructor is responsible for the care given by all students, the instructor may spend the most time with students who require intense instruction or guidance. For this reason, not all students may administer medications every clinical day, especially when beginning students are developing proficiency and
confidence in this skill. Similarly, for students who are demonstrating a nursing procedure for the first time on a “live” client, the instructor must be available to guide the student in successful performance of the skill. It goes without saying that students must be informed prior to the clinical experience that they will be performing these procedures so they can prepare adequately.

Opportunities for leadership and practice of delegation skills are also important. One strategy for providing these experiences is to assign one or two students the team leader role with other students being members of their team. In this way, the “team leader” interacts with the “team members” under the guidance of the instructor to ensure that client needs are met.

Clinical instructors must be active participants in nursing students’ learning. They must be readily available to students for guidance, answers, and support throughout the clinical day. If students are off the primary nursing unit for observational experiences, the clinical instructor should make telephone contact to insure that the student is achieving the objectives of the observational experience.

**Post-conference.** Post conference is a time to analyze and synthesize the events of the clinical day. It is essential to summarize the day’s experiences and set goals for future clinical days.

There are many strategies for creating a successful post conference. Often, post conference is used to process student feelings about some critical event of the day, such as the death of a client, a successful CPR, a client’s diagnosis of a terminal condition, or a client’s hostile or belligerent behavior. Post conference may also be used for students to present their client/patient using a “nursing rounds” model. All students can then participate in discussion about the care provided and alternatives to that care. Such discussion can be used to challenge students to defend the care they planned. Sometimes, post conference may be used for specialized health professionals, such as the infection control nurse, social worker, or respiratory therapist or chaplain to discuss their role in client care.

Post conference should always be done in an environment where client confidentiality is maintained. The activities of post conference can help students synthesize the events of the clinical day through critical analysis of their client care.

**Components of MSN Nurse Practitioner Clinical Experiences**

**Student clinical rotations.** Student clinical rotations are established the semester before each clinical course as a collaborative process between faculty and students. Clinical rotations are based on student learning needs and course/program objectives. Clinical faculty members evaluate the student’s prior experiences in determining the most appropriate clinical site for the student.

Students must do clinical rotations in sites and with preceptors for whom CNHS has all required contract and other documents as deemed by the CNHS Office of Clinical Education. Students must also have completed a satisfactory clinical clearance process prior to starting the clinical rotation.
While faculty members strive to collaborate with students to determine the best clinical placements, certain clinical-related situations are prohibited:

- Students cannot choose family or close friends as clinical preceptors.
- Students cannot do their clinical rotation in the unit where they work (if student works in a large institution, they may do their rotation in their institution but on a different unit).
- Students cannot do clinical rotations in an ICU/progressive care unit.
- Students will only be allowed to observe during hospital rounds if the preceptor is not an employee of the hospital. Observations must be kept at a minimum as the purpose of clinical rotations is “hands on practice”.
- A majority of students’ clinical rotations will be with nurse practitioners.
- Students are encouraged to change clinical sites (the type and location) and preceptors every semester to obtain the broadest experiences.
- Clinical rotations can only take place during times when school is in progress, i.e., not during December recess, spring break, etc.

**Clinical practice and conferences.** Clinical instructors must be active participants in nursing students’ learning. They must be readily available to students for guidance, answers, and support throughout the clinical rotation. Students are responsible for making faculty aware of any issues/concerns pertaining to clinical practice in a timely manner. During the clinical rotation, students and faculty must schedule conferences or meet to discuss clinical cases.

Conference is a time to analyze and synthesize the events of the clinical experiences. It is essential to summarize the day’s experiences and set goals for future clinical days.

There are many strategies for creating a successful conference. Often, conference is used to process student feelings about some critical event, such as the death of a client, a client’s diagnosis of a terminal condition, or a client’s hostile or belligerent behavior, challenging diagnosis and/or management, or adaptation to the new role as a nurse practitioner. Conference may also be used for students to present their client/patient using a “nursing rounds” model. All students can then participate in discussion about the care provided and alternatives to that care. Such discussion can be used to challenge students to defend the care they planned.

Conference should always be done in an environment where client confidentiality is maintained. The activities of conference can help students synthesize the events of their clinical rotation through critical analysis of their client care.

Faculty members are responsible for regularly evaluating student clinical performance. The faculty can evaluate the students by observing them at their clinical site, communicating with preceptor/s and communication with students (e.g. clinical conference times etc.).
At the End of the Semester

Course Evaluations
University policy requires that all courses/faculty are evaluated by the students. Students fill out a standardized evaluation form provided by the University for each course. The nursing unit also provides an attachment for student comments. The faculty member cannot be present during the process or handle evaluation forms. Course evaluations must be done before the day of the final exam. The Program secretary will contact faculty as to who will do the evaluations and when they will be conducted.

Grade Reports
Students in academic jeopardy in a course should be notified in writing at midterm by the respective faculty member. A copy of the notification shall be placed in the student’s file.

Students in academic jeopardy for program progression are notified by their faculty advisor or the Program Director at the end of the semester. Specific policies/procedures related to academic progression and dismissal are described in the student policies/procedures manuals.

Faculty shall complete and submit grade reports through the Panthersoft system by the specified date. Once submitted and posted at the end of the semester, final grades can be accessed by students (with their PIN and Panther ID number) on the University’s web page. Clinical evaluations of students must be placed in student’s files on completion of the course.

Incomplete Grades
An incomplete grade is a temporary symbol given at the discretion of the instructor for work not completed, because of a serious interruption not caused by the student’s own negligence. An "I" grade must be reported to the Program Director and an Incomplete Grade form must be placed in the student's file describing the work the student must complete for clearing an incomplete grade. An incomplete must be made up as quickly as possible, but no later than two semesters or it will automatically default to the earned grade or F.

The student must not register again for the course to make up the incomplete. Students who receive an incomplete grade and have applied for graduation at the end of that term, must complete the incomplete grade by the end of the fourth week of the following term to graduate.
ADJUNCT FACULTY INFORMATION

Introduction
Adjunct faculty negotiate a complex bureaucratic system that is often perplexing, frustrating, and full of impediments. However, there is assistance along the way:

First, read this manual. The information provides an overview of the Florida International University (FIU), the College of Nursing and Health Sciences (CNHS), and the nursing unit and its programs. The sections also list University, College and nursing unit documents where information can be found, and describe general faculty information and faculty policies/procedures.

Second, explore the FIU, CNHS, and nursing web sites. Just start clicking on links. Many of the documents referred to in the Nursing Faculty Handbook are found on the web sites along with other valuable information.

Third, attend (if at all possible) the general orientation session for adjunct faculty held at the beginning of the semester. The orientation session provides you with the “nuts and bolts” of signing on and functioning as an adjunct instructor.

Fourth, identify FIU personnel who can assist you:

- Personnel in the Office of Administrative Affairs answer your “sign-on,” “contract” and “paycheck” questions. Please provide the Office with the following documents:
  - A copy of your updated curriculum vita or resume;
  - A copy of your nursing license; and
  - Final transcripts of your undergraduate and graduate degrees.
  - These documents are mandated by University policy and FIU/nursing unit accrediting bodies.

- The FIU faculty member coordinating your course (Course Coordinator/Track Leader) will give you specific information and pertinent forms and schedules related to the course. Sometimes the Director of the Undergraduate or Graduate Program functions as the Course Coordinator. He/she can answer questions about the course syllabi, course requirements, policies/procedures, and student evaluations. The Course Coordinator/Track Leader will provide you with his/her phone or beeper number so you can call if questions or problems arise during the semester.

- If you need to contact someone immediately and are unable to reach your Course Coordinator/Track Leader, you can contact the Program Director. The Directors are usually in the nursing unit office during the day or they can be contacted via a secretary or the Dean’s Office.

- The Program secretaries are valuable resource people. They can answer questions related to semester deadlines, grade reports, registration lists, book orders, etc. If they can’t answer a question, they will refer you to your faculty Course Coordinator/Track Leader or the appropriate Director.
Fifth, review the role description for the Adjunct Instructor and the general information for adjunct faculty. That gives you information that can get you started and on your way.

The University recognizes that, although adjunct faculty members provide an important service to the University, their situation is sometimes a difficult one. Therefore, the University Administration and the United Faculty of Florida (UFF) have jointly created a Committee on Adjunct Faculty. The Committee provides a voice for adjunct faculty concerns and has successfully won new benefits through its efforts. If you are interested in becoming active on this committee, contact the Office of the Vice-Provost for Academic Affairs.

Office Space, Keys, Telephones, and Mail Slot
Office space is at a premium and often difficult to find. If you are teaching on campus, you may be able to share an office (or a desk or table) with a willing faculty member or another adjunct faculty member. If you are assigned a space, make sure that you have a key to access the area. If a secretary is available in the evening, she/he may be able to provide access.

You are entitled to have access to a telephone on campus for making and receiving work-related calls. If you are rarely on campus, the secretaries can take messages for you. Call the secretary on a regular basis to retrieve your messages. To reduce “telephone tag,” many adjunct faculty members use beepers and/or cell phones that allow students to contact them directly.

Please make sure you are assigned your own mail slot for general communications. Nursing unit administrators and staff must be able to leave you messages and papers. Only you, staff, faculty and administrators should have access to your mail slot. Students who are turning in papers should give them to the Program secretary. Student papers which you return or messages for students should also be given to the secretary.

Parking
Every car must have a decal (except for metered parking) in order to park on the FIU campuses. If you are teaching for only one semester, you can purchase a one-semester parking decal. For information on where to obtain a decal and the cost, contact FIU Parking Services or go to their website. Failure to obtain a decal can result in expensive parking tickets.

Benefits
Although adjunct faculty members are not entitled to University employee health benefits or other employee benefits, they are eligible for the health plan available to alumni. If you are interested, ask about the plan during the sign-on process. Adjunct faculty members are eligible to use the services of the University Credit Union once they complete a contract.
NURSING UNIT CLASSROOM VISIT/OBSERVATION GUIDELINES

The following guidelines assist the evaluator and the faculty member during a classroom visitation/observation of a faculty member. Since classes vary according to the program, the course level, and the topic, these guidelines must be considered within the context of the overall course/class objectives. (i.e., all items may not be addressed or additional/alternate items may be addressed):

**Teaching/Learning Objectives:** Classroom or clinical teaching/learning objectives are communicated in writing, clearly explicated, appropriate to level of course, and related to the specific content being taught.

**Class Preparation:** Class preparation reflects planning as evidenced by a course topical outline, a course schedule, clinical assignments, pertinent announcements, a class outline, appropriate handouts, and management of teaching time.

**Teaching Strategies:** Teaching strategies utilized are appropriate to the content area.

**Classroom Environment:** Order and discipline are maintained in the classroom.

**Organization and Presentation of Content:** Content is well organized and easy to follow.

**Quality of Presentation Materials:** Materials are error-free (spelling, grammar), legible, simple, concise, and visually appealing. References are current and in APA style.

**Learning Environment:** The faculty member fosters a learning environment that encourages questions, expression of ideas, and discussion of disagreements.

**Knowledge of Content:** The faculty member demonstrates knowledge and mastery of the content area. Appropriate research findings are incorporated into the content.

**Presentation:** The presentation is clear, understandable, with minimal use of notes, and the use of an appropriate vocabulary.

**Presentation of concepts:** Abstract ideas, concepts, and theories are clearly interpreted.

**Involvement of Students:** The faculty member consistently commands the attention, interest and involvement of students.

**Attitude toward Students:** The faculty member proactively seeks ways to assist students.
NURSING RANKS AND POSITIONS

Nursing unit administrators and faculty have developed role descriptions for faculty and administrative appointments, and academic support personnel. The following role descriptions outline the qualifications and major responsibilities for each nursing position and are used as a basis for evaluations.

Faculty members are appointed to a specific rank by the Dean. This appointment is based on the faculty member's academic credentials, research, publications, teaching, and other experiences. Faculty role descriptions are the basis for annual evaluations, tenure and promotion decisions, and merit recommendations. Further information related to faculty rank and position may be found in the BOT/UFF Collective Bargaining Agreement and the FIU/CNHS/Nursing Unit Tenure and Promotion Policies/Procedures.
I. Role Description
The Dean reports directly to the Provost of the University. The Dean provides leadership and facilitates the development of a vision for the nursing unit. The Dean carries out (a) general administrative functions; (b) general academic functions; (c) development and administration of the budget to support academic programs; (d) initiation and implementation of policies and programs related to the academic functions of the nursing unit, (e) coordination and recruitment, selection, appointment, and evaluation of employees; and (f) representation of the nursing unit within the College and University as well as external agencies, constituent groups, appropriate policy and advisory boards or committees, and the public.

II. Qualifications
An earned doctorate and five years recognized administrative leadership in the field and seven years of teaching experience in an institution of higher education. Tenure is required. The faculty member will assume the roles and responsibilities commensurate with his/her academic rank. The Dean is required to be licensed as a registered nurse (RN) in the State of Florida.

III. Administrative Line of Authority
The Dean is first in command within the College and nursing unit.

IV. Administrative Responsibilities

1. Administers the overall operation of the nursing unit in a competent manner.
2. Defines short and long term goals for the development of the nursing unit.
3. Demonstrates futuristic, creative abilities.
4. Plans effectively for achieving the goals and objectives of the nursing unit.
5. Utilizes outcome measures for making improvements in the nursing unit.
6. Demonstrates a proactive stance.
7. Develops and maintains an effective Administrative Council.
8. Supports collegiality among faculty, administrators, and staff.
9. Interacts with administrators, faculty, staff and students fairly & consistently.
10. Solicits administrator and faculty approval on important matters.
11. Elicits suggestions for program improvement.
12. Initiates and directs successful courses of action.
13. Solves problems in a professional manner.
14. Explains the rationale in decision making.
15. Suggests mechanisms for reducing, preventing and resolving conflicts.
16. Communicates deadlines to others in an expedient manner.
17. Completes assignments on time.
18. Responds to administrator, faculty and student concerns in a timely fashion.
19. Is readily available.
20. Chairs meetings effectively.
V. Academic Responsibilities

1. Stimulates research and scholarly activity.
2. Conducts research.
3. Publishes consistently.
4. Presents scholarly papers on a regular basis.
5. Maintains effective teaching skills.

VI. Responsibilities Related to Budget Development and Administration

1. Demonstrates competence in the budgetary process.
2. Articulates effectively in the procurement of resources.
3. Facilitates obtaining grants and contracts from extramural sources.
4. Allocates resources in a fiscally responsible manner.
5. Allocates available resources to administrators, faculty and staff equitably.
6. Collaborates with the College Director of Development in obtaining donations.

VII. Responsibilities Related to Initiation and Implementation of Academic Policies and Programs

1. Communicates clearly, policies and program information to faculty, staff, students and the external community.
2. Communicates College and University administration expectations to the CNHS Administrative Council and faculty.
3. Communicates administrator and faculty expectations to the College and University administration.
4. Facilitates the initiation of and revision of policies and programs.
5. Informs administrators and faculty of new and changed policies.

VIII. Responsibilities Related to Recruitment, Selection, Appointment and Evaluation of Faculty and Staff

1. Collaborates with faculty and administrators on recruitment recommendations
2. Builds a cohesive team of faculty, administrators, and staff.
3. Assigns appropriate workloads to administrators, faculty and staff.
4. Oversees the faculty and staff evaluation process.
5. Delegates responsibility and authority appropriately.
6. Promotes faculty and staff development efforts.
8. Makes appropriate recommendation on personnel actions.

IX. Responsibilities Related to Representation of the Nursing Unit

1. Maintains high visibility and effective liaisons at College and University level.
2. Maintains liaisons/contacts with the nursing unit’s off-campus public.
3. Enhances the program’s image and reputation in the University and community.

X. Performance Evaluation

Evaluation will be based on the role description criteria.
GRADUATE PROGRAM DIRECTOR

I. Role Description
The faculty member holds the title Graduate Program (MSN) Director. The major responsibilities of the position are administering the Graduate Nursing Program in the areas of (a) governance; (b) curriculum and instruction; (c) faculty affairs; (d) student affairs; (e) communication (f) budget and resources; (g) office/physical plant management; and (h) professional development. Administrative responsibilities constitute 75% of the assignment; the remaining 25% of the assignment constitute teaching and/or scholarly activities.

II. Qualifications
An earned doctorate, preferably in nursing, and an MSN degree with three years of recognized administrative leadership in the field and a record of research and graduate teaching in accredited institution(s) of higher education. The Director will assume the faculty roles and responsibilities commensurate with his/her respective rank. Must be RN licensed in the State of Florida and certified as an Advanced Registered Nurse Practitioner (ARNP).

III. Administrative Line of Authority
Accountable to the Dean in development and implementation of the Graduate Nursing Program. Is a member of the Dean’s Administrative Council.

IV. Program Responsibilities

Governance

1. Conducts Graduate Program meetings.
2. Establishes Graduate Program committees and task forces.
3. Promotes effective Graduate Program committee/task force processes and outcomes.
4. Develops Graduate Program short-range and long-range program goals, objectives, and action plans in collaboration with the Dean and the Program faculty.
5. Implements Program goals, plans and policies in collaboration with the Dean, the Program faculty, Directors/Assistant Deans for Admissions and Student Services, and Coordinators (i.e., IT, STAR Center, Evaluation).
6. Prepares the Program faculty for accreditation, regulatory, and evaluation processes.
7. Serves as an advocate for the Graduate Program and its faculty.
8. Monitors library acquisitions in collaboration with the Program faculty and the nursing unit Library Representative.
9. Delegates Program administrative responsibilities to individuals and committees, as appropriate.
10. Encourages faculty members to communicate ideas for improving the Graduate Program.
11. Consults with Program faculty on services provided to the University and the community.
Curriculum and Instruction

1. Collaborates with Program faculty and the Curriculum Committee to ensure that graduate curriculum and clinical placement revisions are made in light of current trends in health care and achievement of Program purposes.
2. Oversees the posting of faculty office hours.
3. Prepares and oversees the class schedule for the Graduate Program in collaboration with the Dean and the Director of the Undergraduate Program.
4. Supervises off-campus Graduate Program offerings.
5. Oversees Graduate Program examinations.
6. Monitors theses, master’s papers, prospectuses, and programs of study for graduate students.
7. Serves as ex-officio member of all nursing committees and the Nursing Advisory Council.

Faculty Affairs

1. Recruits and recommends faculty members in collaboration with the Search and Screen Committee.
2. Assigns Graduate faculty responsibilities, such as teaching, research/scholarly activity, and service in collaboration with the Director of the Undergraduate Program and the Dean.
3. Collaborates with the Director of the Undergraduate Program in faculty-related responsibilities for faculty who have assignments in both the Graduate and Undergraduate programs.
4. Promotes Program faculty productivity in teaching, research/scholarly activity, and service.
5. Conducts formative and summative evaluations of Graduate Program faculty in compliance with the BOT-UFF Collective Bargaining Agreement.
6. Makes merit recommendations in collaboration with the Dean and in compliance with the BOT-UFF Collective Bargaining Agreement.
7. Informs the faculty of Program, College and University plans, activities and expectations.
8. Promotes and maintains a positive work environment for faculty and staff in collaboration with the Director of the Undergraduate Program and Dean.
9. Encourages faculty participation in Graduate Program activities.

Student Affairs

1. Oversees recruitment, selection and administration of students for the Graduate Program in collaboration with the Assistant Dean/Director of Admissions/Student Services and the Student Affairs Committee.
2. Serves as a liaison to University student and support services.
3. Oversees registration processes and procedures.
4. Oversees the advisory processes for students entering and matriculating through the Program.
5. Advises and counsels Graduate students when the problem cannot be resolved by the student’s advisor and/or faculty member.
6. Facilitates academic enrichment and honors programs.
7. Advises and counsels students on matters pertinent to student life and the Program.
Communication

1. Communicates Graduate Program needs to the Dean.
2. Improves and maintains the Graduate Program’s image and reputation.
3. Coordinates Graduate Program activities with activities within the University and the community.
4. Completes forms and surveys related to Graduate Program activities and performance in collaboration with the Evaluation Coordinator.
5. Initiates and maintains a liaison with external agencies and institutions.

Budget/Resources

1. Encourages faculty members to submit proposals for contracts and grants to public and private agencies in collaboration with the Office of Research and Dean.
2. Assists the Dean in planning the Graduate Program budget.
3. Seeks outside funding to support the Graduate Program and students in collaboration with the Dean.
4. Assists the Dean in administering the Graduate Program budget.
5. Prepares annual budgetary reports related to the Graduate Program activities in collaboration with the Office of Budget and Operations and the Dean.

Office/Physical Plant Management

1. Oversees Graduate Program facilities and equipment, including maintenance and control of inventory in collaboration with the Coordinator, STAR Center and Assistant Dean, Instructional Technology.
2. Assists the Dean in supervising and evaluating support staff in the Graduate Program.
3. Maintains essential Graduate Program records, including student records.

Professional Development

1. Fosters development of Graduate Program faculty members’ talents and interests.
2. Fosters effective teaching of faculty in the Graduate Program.
3. Stimulates Graduate Program faculty research and publications in collaboration with the Research Coordinator.
4. Promotes affirmative action.
5. Encourages Graduate Program faculty members to participate in regional and national professional meetings.
6. Represents the Graduate Program and the School at meetings of learned and professional societies.

V. Performance Evaluation

Evaluation will be based on the role description criteria and annual assignments.
UNDERGRADUATE PROGRAM DIRECTOR

I. Role Description
The faculty member holds the title Undergraduate Program Director. The major responsibilities of the position are administering the Undergraduate (MSN) Nursing Program in the areas of (a) governance; (b) curriculum and instruction; (c) faculty affairs; (d) student affairs; (e) communication (f) budget and resources; (g) office/physical plant management; and (h) professional development. Administrative responsibilities constitute 75% of the assignment; the remaining 25% of the assignment constitute teaching and/or scholarly activities.

II. Qualifications
An earned doctorate, preferably in nursing, and an MSN degree with three years of recognized administrative leadership in the field and a record of research and undergraduate teaching in accredited institution(s) of higher education. The Director will assume the faculty roles and responsibilities commensurate with his/her respective rank. Must be RN licensed in the State of Florida.

III. Administrative Line of Authority
Accountable to the Dean in development and implementation of the Undergraduate Program. Is a member of the Dean’s Administrative Council.

IV. Program Responsibilities

Governance

1. Conducts Undergraduate Program meetings.
2. Establishes Undergraduate Program committees and task forces.
3. Promotes effective Undergraduate Program committee/task force processes and outcomes.
4. Develops Undergraduate Program short-range and long-range goals, objectives, and action plans in collaboration with the Dean and the Program faculty.
5. Implements Program goals, plans and policies in collaboration with the Dean, the Program faculty, Directors/Assistant Deans for Admissions and Student Services, and Coordinators (i.e., IT, STAR Center, Evaluation).
6. Prepares the Program faculty for accreditation, regulatory, and evaluation processes.
7. Serves as an advocate for the Undergraduate Program and its faculty.
8. Monitors library acquisitions in collaboration with the Program faculty and the nursing unit Library Representative.
9. Delegates Program administrative responsibilities to individuals and committees, as appropriate.
10. Encourages faculty members to communicate ideas for improving the Undergraduate Program.
11. Consults with Program faculty on services provided to the University and the community.
**Curriculum and Instruction**

1. Collaborates with Program faculty and the Curriculum Committee to ensure that undergraduate curriculum and clinical placement revisions are made in light of current trends in health care and achievement of Program purposes.
2. Oversees the posting of faculty office hours.
3. Prepares and oversees the class schedule for the Undergraduate Program in collaboration with the Dean and the Director of the Graduate Program.
4. Supervises off-campus Undergraduate Program offerings.
5. Oversees Undergraduate Program examinations.
6. Serves as ex-officio member of all nursing committees and the Nursing Advisory Council.

**Faculty Affairs**

1. Recruits and recommends faculty members in collaboration with the Search and Screen Committee.
2. Assigns Undergraduate faculty responsibilities, such as teaching, research/scholarly activity, and service in collaboration with the Director of the Graduate Program and the Dean.
3. Collaborates with the Director of the Graduate Program in faculty-related responsibilities for faculty who have assignments in both the Graduate and Undergraduate programs.
4. Promotes Program faculty productivity in teaching, research/scholarly activity, and service.
5. Conducts formative and summative evaluations of Undergraduate Program faculty in compliance with the BOR-UFF Collective Bargaining Agreement.
6. Makes merit recommendations in collaboration with the Dean and in compliance with the BOT-UFF Collective Bargaining Agreement.
7. Informs the faculty of Program, School and University plans, activities and expectations.
8. Promotes and maintains a positive work environment for faculty and staff in collaboration with the Director of the Graduate Program and Dean.
9. Encourages faculty participation in Undergraduate Program activities.

**Student Affairs**

1. Oversees recruitment, selection and administration of students for the Undergraduate Program in collaboration with the Director of Admissions and Student Services and the Student Affairs Committee.
2. Serves as a liaison to University student and support services.
3. Oversees registration processes and procedures.
4. Oversees the advisory processes for students entering and matriculating through the Program.
5. Advises and counsels Undergraduate students when the problem cannot be resolved by the student’s advisor and/or faculty member.
6. Facilitates academic enrichment and honors programs.
7. Advises and counsels students on matters pertinent to student life and the Program.
**Communication**

1. Communicates Undergraduate Program needs to the Dean.
2. Improves and maintains the Undergraduate Program’s image and reputation.
3. Coordinates Undergraduate Program activities with activities within the University and the community.
4. Completes forms and surveys related to Undergraduate Program activities and performance in collaboration with the Evaluation Coordinator.
5. Initiates and maintains a liaison with external agencies and institutions.

**Budget/Resources**

1. Encourages faculty members to submit proposals for contracts and grants to public and private agencies in collaboration with the Office of Research and Dean.
2. Assists the Dean in planning the Undergraduate Program budget.
3. Seeks outside funding to support the Undergraduate Program and students in collaboration with the Dean.
4. Assists the Dean in administering the Undergraduate Program budget.
5. Prepares annual budgetary reports related to the Undergraduate Program activities in collaboration with the Office of Budget and Operations and the Dean.

**Office/Physical Plant Management**

1. Oversees Graduate Program facilities and equipment, including maintenance and control of inventory in collaboration with the Coordinator, STAR Center and Assistant Dean, Instructional Technology.
2. Assists the Dean in supervising and evaluating support staff in the Undergraduate Program.
3. Maintains essential Undergraduate Program records, including student records.

**Professional Development**

1. Fosters development of Undergraduate Program faculty members’ talents and interests.
2. Fosters effective teaching of faculty in the Undergraduate Program.
3. Stimulates Undergraduate Program faculty research and publications in collaboration with the Research Coordinator.
4. Promotes affirmative action.
5. Encourages Program faculty members to participate in regional and national professional meetings.
6. Represents the Undergraduate Program and the School at meetings of learned and professional societies.

**V. Performance Evaluation**

Evaluation will be based on the role description criteria and annual assignments.
PROFESSOR

I. Role Description
This faculty member holds the academic rank of professor. The major responsibilities of the position are leadership in teaching undergraduate and/or graduate students, service, and research and/or other creative activities.

II. Qualifications
An earned doctorate and recognized leadership in the field of specialization with five years teaching experience in an institution of higher education or equivalent professional experience. An MS in Nursing is required. Must be RN licensed in the State of Florida.

III. Administrative Line of Authority
Directly responsible to the person indicated in the nursing unit organizational chart in meeting program responsibilities.

IV. Program Responsibilities

General

1. Effectively teaches knowledge, skills and values related to course objectives.
2. Stimulates critical thinking and creative ability of students and colleagues.
3. Exemplifies standards of professional conduct toward students and colleagues in carrying out responsibilities.
4. Utilizes creative and effective approaches to develop, implement and evaluate instructional programs through consultation and collaboration with colleagues and appropriate individuals.
5. Provides consultation as appropriate to junior faculty.
6. Chairs and/or serves as a member on students' scholarly papers/theses/dissertation committees.
7. Provides leadership in supporting the mission and philosophy of the nursing unit, College, and the University.

Governance
Provides leadership to the nursing unit, College, and University by chairing committees, task forces, and providing consultation to colleagues as appropriate.

Instructional Responsibilities

1. Delivers lectures to the nursing unit and other University students.
2. Provides leadership and consultation in developing, implementing, and evaluating effective instructional materials.
3. Provides leadership in fostering faculty development of effective instructional and evaluation methods.
4. Initiates program development, implementation, and evaluation.
5. Incorporates research findings in teaching and practice.
**Clinical Teaching**

1. Serves as a clinical role model to colleagues and students.
2. Effectively teaches knowledge, skills and values relative to clinical practice.
3. Provides leadership in stimulating students' critical thinking and creative abilities relative to clinical practice.
4. Provides leadership in developing effective clinical teaching and evaluation methods.
5. Provides leadership in fostering agency relationships with the nursing unit, College and University.

**Academic Advisement**

1. Participates in academic advisement.
2. Provides leadership in the advisement process.

**Research, Grants, and Publications**

1. Initiates programs to enhance research and/or creative activities, and the research capabilities of students, faculty, and others.
2. Provides leadership in developing research competencies in colleagues and students.
3. Represents research interests and activities in the University and public.
4. Publishes articles, texts, and other scholarly works in national and/or international forums.
5. Provides leadership in developing proposals and/or administering grants.
6. Conducts clinical, educational, or evaluation research studies.
7. Presents scholarly papers to professional groups.

**Service**

1. Shares specialized knowledge through clinical or other professional practice.
2. Consults with agencies, institutions, and other groups or individuals.

**V. Performance Evaluation**

Evaluation will be based on the role description criteria and annual assignments.
CLINICAL PROFESSOR

I. Role Description
This faculty member holds the academic rank of clinical professor. The major responsibilities of the position are teaching undergraduate and graduate students, and leadership in service to the program/nursing unit/college and the University, as well as to the community. This is not a tenure accruing position.

II. Qualifications
An earned doctorate and recognized leadership in the field of specialization with five years teaching experience in an institution of higher education or equivalent professional experience. A MS in Nursing is required. Certification in the faculty member's area of expertise is required. Must be RN licensed in the State of Florida.

III. Administrative Line of Authority
Directly responsible to the person indicated in the nursing unit organizational chart in meeting program responsibilities.

IV. Program Responsibilities

General

1. Effectively teaches knowledge, skills and values related to course objectives.
2. Stimulates critical thinking and creative ability of students and colleagues.
3. Exemplifies standards of professional conduct toward students and colleagues in carrying out responsibilities.
4. Utilizes creative and effective approaches to develop, implement, and evaluate instructional programs through consultation and collaboration with colleagues and other appropriate individuals.
5. Provides consultation as appropriate to junior faculty.
6. Chairs and/or serves as a member on nursing unit students' scholarly papers, thesis/dissertation committees.
7. Provides leadership in supporting the mission and philosophy of the nursing unit, College and the University.

Governance
Provides leadership to the nursing unit, College and University by chairing committees and task forces, serving on committees and task forces, and providing consultation to colleagues as appropriate.

Instructional Responsibilities

1. Delivers lectures to nursing unit and other University students.
2. Provides leadership and consultation in developing, implementing, and evaluating effective instructional materials for advanced clinical practice.
3. Provides leadership in fostering faculty development of effective instructional and evaluation methods for advanced clinical practice.
4. Initiates program development, implementation, and evaluation for advanced clinical practice.
5. Incorporates research findings in teaching and practice.
**Clinical Teaching**

1. Serves as an advanced practice clinical role model to colleagues and students.
2. Effectively teaches knowledge, skills, and values relative to advanced clinical practice.
3. Provides leadership in stimulating students' critical thinking and creative abilities relative to advanced clinical practice.
4. Provides leadership in developing effective teaching and evaluation methods for advanced clinical practice.
5. Provides leadership in fostering agency relationships with the nursing unit, College and University.

**Academic Advisement**

1. Participates in academic advisement.
2. Provides leadership in the advisement process.

**Creative Activities**

1. Initiates programs to enhance clinical-focused creative activities.
2. Represents clinical-focused interests and activities in the University and public.
3. Publishes articles, texts, and other scholarly works in national and/or international forums.
4. Provides leadership in developing clinical-focused proposals and/or administering grants.
5. May conduct clinical-focused and educational research studies.
6. Presents scholarly papers to professional groups.

**Service**

1. Shares specialized knowledge through clinical or other professional practice.
2. Consults with agencies, institutions, and other groups or individuals.
3. Presents and/or develops continuing education programs.
4. Assists colleagues in presenting and/or developing continuing education programs.
5. Assists colleagues in developing greater professional visibility.
6. Promotes and interprets the nursing profession and the nursing unit to the University and the public.

**Professional Development**

1. Attends and participates in continuing education programs, professional meetings, conferences, and workshops in national/international forums.
2. May take courses as appropriate.
3. Reads scholarly journals, books, and other publications.
4. Promotes and fosters the professional growth of colleagues and students.
5. Achieves local and state recognition for professional work and contributions.

**V. Performance Evaluation**

Evaluation will be based on the role description criteria and annual assignments.
ASSOCIATE PROFESSOR

I. Role Description
This faculty member holds the academic rank of associate professor. The major responsibilities of this position are teaching undergraduates and/or graduate students, service, and research or other creative activities. This is a tenure accruing position.

II. Qualifications
An earned doctorate with three years of teaching in an institution of higher learning or equivalent professional experience. A MS in Nursing is required. Must be RN licensed in the State of Florida.

III. Administrative Line of Authority
Directly responsible to the person indicated on the nursing unit organizational chart in meeting program obligations.

IV. Program Responsibilities

General

1. Effectively teaches knowledge, skills and values related to course objectives.
2. Stimulates critical thinking and creative ability of students.
3. Exemplifies standards of professional conduct toward students and colleagues in carrying out responsibilities.
4. Assists in providing leadership in development, implementation, and evaluation of instructional programs.
5. Assists in providing leadership to support the mission and philosophy of the nursing unit, College and University.

4. Works collaboratively with peers (staff and faculty) for implementation of the education program for which the faculty member was appointed.
5. Carries out assigned responsibilities for course planning and student evaluation.
6. May initiate course and program development.

Research, Grants, and Publications

1. Reads research and incorporates findings into teaching and practice.
2. May participate in research and/or other creative activities.

Service
Participates in nursing unit, College and University activities.

Other Responsibilities
May participate in academic advisement.

V. Performance Evaluation
Evaluation will be based on the role description criteria and annual assignments.
ADJUNCT INSTRUCTOR

I. Role Description
This faculty member holds the academic rank of adjunct instructor. The major responsibility of the position is teaching undergraduate or graduate students during the contract period appointment.

II. Qualifications
A Master's degree in nursing with a minimum of one (1) year of teaching in an institution of higher learning or equivalent professional experience is preferred. For teaching graduate students, a doctorate is preferred.

III. Administrative Lines of Authority
Directly responsible to the Director of the Program.

IV. Program Responsibilities
1. Collaborates with peers (faculty and staff) for implementation of the education program for which the faculty member was appointed.
2. Promotes a climate which facilitates student learning.
3. Teaches in various educational settings, e.g., theory, clinical, practicum.
4. Carries out assigned responsibilities for course planning and student evaluation.
5. Reads and incorporates research findings into teaching and practice.
6. May participate in research and/or other creative activities.
7. May participate in nursing unit activities.

V. Performance Evaluation
Evaluation is based on established criteria for the instructor rank/position.
NURSING COURSE COORDINATOR/TRACK LEADER

I. Role Description
This faculty member holds a minimum academic rank of instructor. The major responsibility of the position is the coordination of a course or courses.

II. Qualifications
A Master's degree in nursing with a minimum of one (1) year of teaching in an institution of higher learning or equivalent professional experience. Faculty members within the nursing unit are required to be RN licensed in the State of Florida.

III. Administrative Lines of Authority
Directly responsible to the Director.

IV. Program Responsibilities

Clinical/Practicum Course Coordinator/Track Leader

1. Selects textbooks and referenced materials with input from adjunct instructors/preceptors.
2. Reviews and updates the clinical course syllabi and module(s).
3. Specifies learning resources needed for classes.
4. Identifies potential clinical/practicum sites.
5. Identifies student learning experiences in clinical/practicum sites.
6. Identifies potential adjunct instructors/preceptors for the Program Director.
7. Conducts coordinator meetings with the assigned faculty.
8. Maintains a master list of students registered for the clinical course.
9. Ensures that clinical/practicum site requirements are met.
10. Assigns students to clinical rotations.
11. Assists students in identifying and implementing remediation as appropriate.
12. Schedules and monitors clinical examinations, as appropriate.
13. Notifies students in academic jeopardy at midterm.
14. Ensures course/instructor/clinical site evaluation by students.
15. Ensures student evaluation by adjunct instructors/preceptors.
16. Provides input into the evaluation process of adjunct instructors/preceptors.
17. Evaluates clinical learning experiences with adjunct instructor/preceptor input.

Theory Course Coordinator/Track Leader

2. Reviews and updates the course syllabus and module(s).
3. Specifies learning resources needed for course.
4. Conducts coordination meetings.
5. Maintains a master grade roll of students enrolled in course.
6. Identifies student learning experiences in course.
7. Assists students in identifying and implementing remediation as appropriate.
8. Plans and prepares course assignments.
9. Schedules and monitors course examinations, as appropriate.
10. Notifies students in academic jeopardy at midterm.
11. Ensures student evaluation of course/instructor.
BSN CLINICAL PRECEPTOR

I. Role Description
The major responsibility of the position is teaching undergraduate students in a clinical area. This is not a tenure earning position.

II. Qualifications
A minimum of a baccalaureate degree or additional education in an expanded role with a committed belief in the expanded role of the professional nurse and exhibited expertise in the field of preparation. Must be RN licensed in the State of Florida.

III. Administrative Lines of Authority
Directly responsible to the supervising faculty member or administrator.

IV. Program Responsibilities

1. Provides opportunities for the student to pursue individual learning objectives within the parameters of the facility and in accord with the nursing role assumed by the preceptor
2. Allows the student the freedom to independently and/or collaboratively apply the skills of assessing, diagnosing, planning, implementing, and evaluating own nursing practice.
3. Provides opportunities for the student to assume a leadership role as a learning experience within the confines of the practice setting.
4. Serves as a resource person, consultant and supervisor for the student’s clinical nursing experience.
5. Requires a written composite copy of the student’s objectives prior to allowing student to begin clinical experience in the facility.
6. Assumes responsibility for making student assignments for dependent, interdependent, and dependent practice with careful attention given to the scope of the student’s knowledge and skills.
7. Provides student evaluations which include documentation of the accomplishment of each objective.
8. Assists clinical faculty in evaluating the preceptorship experience and discussion of revisions.

V. Performance Evaluation
Evaluation is based on established criteria for the clinical preceptor.
DIRECTOR OF ADMISSIONS AND STUDENT SERVICES - NURSING

I. Role Description

This support staff member (who may also hold a faculty member rank) holds the title Director of Admissions and Student Services. The major responsibilities of the position are in the areas of (a) student services; (b) recruitment; (c), advisement; (d) registration; (e) and graduation. Responsibilities as the Director for Admissions and Student Services constitute 100% of the faculty assignment.

II. Qualifications

Bachelor's degree is required and a master's degree is preferred. Appropriate experience in academic administration/advisement is preferable.

III. Administrative Lines of Authority

Reports directly to the Dean and is a member of the Dean's Administrative Council.

IV. Program Responsibilities

General Student Services

1. Serves as a liaison for student support services within the nursing unit and College.
2. Serves as a liaison with University personnel who provide student support services.
3. Serves as a member of the nursing unit Student Affairs Committee.

Recruitment

1. Develops and maintains audiovisual and printed materials for recruitment purposes in collaboration with the Dean and Directors.
2. Maintains a calendar of recruitment events and activities.
3. Represents the nursing unit at College/University recruitment events and activities.
4. Participates in recruitment activities in the community and at professional organization events.
5. Coordinates an annual job fair for nursing students.

Advisement

1. Assists with individual and group advisement for pre-nursing and incoming undergraduate and graduate students.
2. Organizes, updates and maintains files on pre-nursing and incoming undergraduate and graduate students.
3. Prepares application files for review by the Admissions Committee.
4. Coordinates program orientations for incoming undergraduate and graduate students in collaboration with the Directors.
5. Develops and maintains student advisement and admission databases.
6. Prepares admission and advisement reports for administrators.
7. Screens applications, transcripts, admission evaluations, changes in major, and re-admits, and makes referrals to the appropriate administrator or committee.
8. Maintains a database for financial aid/scholarship resources and assists students in making application.
9. Coordinates student enrollment databases with the nursing unit Evaluation Coordinator.

Registration

1. Assists in conducting on-site registration for incoming and current students.
2. Provides assistance to students who encounter problems during the admission and registration process.

Graduation

Assists in developing and coordinating graduation verification procedures with the Directors.

V. Performance Evaluation

Evaluation will be based on the role description criteria and annual assignments.
